Qualitative-

The Basel Committee for Banking Supervision (BCBS) had proposed the liquidity coverage ratio (LCR) in order to ensure that a bank has an adequate stock of unencumbered high quality liquid assets (HQLA) to survive a significant liquidity stress lasting for a period of 30 days. LCR is defined as a ratio of HQLA to the total net cash outflows estimated for the next 30 calendar days. As per the RBI guidelines the minimum LCR required to be maintained by banks shall be implemented in the phased manner from January 1, 2015 as given below.

Starting from January 1	2015	2016	2017	2018	2019
Minimum LCR	60%	70%	80%	90%	100%

Further due to Covid 19 pandemic RBI has revised the LCR guidelines w.e.f. 17.04.2020, details as given below:

From date of circular to September 30, 2020	80%
Oct 1, 2020 to March 31, 2021	90%
April 1, 2021 onwards	100%

The LCR has two components:

- The value of the stock of high-quality liquid assets (HQLA) in stressed conditions.
- Total net cash outflows: The term "Total net cash outflows" is defined as "Total expected cash outflows" minus "Total expected cash inflows" in the specified stress scenario for the subsequent 30 calendar days (the stressed period).

$$\text{LCR} = \text{Stock of High Quality Liquid Assets} / \text{Total Net Cash Outflows over the next 30 calendar days} \geq 100\%$$

High Quality Liquid Assets (HQLA):

Liquid assets comprise of high quality assets that can be readily sold or used as collateral to obtain funds in a range of stress scenarios. They should be unencumbered i.e. without legal, regulatory or operational impediments. Assets are considered to be high quality liquid assets if they can be easily and immediately converted into cash at little or no loss of value.

Bank's composition of HQLA mainly consists of government securities in excess of minimum Statutory Liquidity Ratio (SLR), the extent allowed under the Marginal Standing Facility (MSF) and the Facility to Avail Liquidity for LCR (FALLCR). Additionally, cash, balances in excess of cash reserve requirement with RBI. Level 2 HQLA primarily consisted of AA- and above rated corporate bonds and commercial papers.

Bank's Cash Outflow mainly consists of Retail Deposit, Unsecured Wholesale Funding, and Funding from other legal entity customers, Undrawn Committed Credit & Liquidity Facilities, Guarantees Letter Of Credit & Trade Finance, and Other Contractual Outflows.

c) NSFR Disclosure Standards

NSFR Qualitative Disclosure

The RBI guidelines stipulated the implementation of NSFR effective from 1st October 2021 at a consolidated level with disclosure from quarter ended December 2021. Accordingly, the bank is computing the Consolidated NSFR. The NSFR is defined as the amount of Available Stable Funding relative to the amount of Required Stable Funding;

$$\text{NSFR} = (\text{Available Stable Funding (ASF)}) / (\text{Required Stable Funding (RSF)})$$

Available stable funding (ASF) is measured based on the broad characteristics of relative stability of funding sources, including contractual maturity of its liabilities and the differences in the tendency of different types of funding providers to withdraw their funding. Required Stable Funding (RSF) is a function of the liquidity characteristics and residual maturities of the various assets held by the bank including Off-Balance Sheet (OBS) exposures.

The table attached herewith sets out the un-weighted and weighted value of the NSFR components as on 30th September 2023 based on audited financials.

At a consolidated level, the NSFR of the bank comes out to 194.29% as on 30th September 2023 against the requirement of 100% as per RBI guidelines.

To promote the consistency and usability of disclosures related to the NSFR and to enhance market discipline, bank is required to publish its NSFR according to a common template given by RBI. Bank is therefore required to publish this disclosure along with the publication of financial statements (i.e. typically quarterly or semi-annually), irrespective of whether the financial statements are audited. The NSFR information is calculated on a consolidated basis and presented in Indian Rupee.

Data must be presented as quarter-end observations. Both un-weighted and weighted values of the NSFR components are to be disclosed unless otherwise indicated. Weighted values are calculated as the values after applying ASF (Available stable funding) or RSF (Required stable funding) factors.

RBI in its circular dated 05.02.2021 decided that NSFR guidelines will come into effect from October 1,2021.
